Combustion Analysis and Carbon Monoxide Safety

Utilizing today's technologies every day!

Join Thousands of HVAC Contractors, Boiler Technicians, and Maintenance Personnel, who have attended and are now providing professional combustion analysis to verify safe, efficient and reliable heating system performance while maximizing service dollars and increasing replacement equipment sales.

TOPICS COVERED IN THIS SEMINAR:

- Commercial / residential flue gas analysis and testing procedures
- Properly interpreting flue gas oxygen, stack temperature and carbon monoxide readings
- Verifying proper fuel and air input
- Training on testing pressure switches
- What draft readings are required & why are they important
- CO safety and carbon monoxide alarms
- Troubleshooting CO and Combustion Problems
- Insuring safe, efficient and reliable operation
- Techniques for identifying heat exchanger, combustion and make-up air problems
- Using combustion analysis to improve your business by giving your customers facts, not opinions
- Learn how to maximize service dollars and increase replacement equipment sales

This session utilizes lecture, field examples, demonstrations, slides, handout materials, and encourages audience participation.
